RE: Map for Water Bank Lease Application

Dear Ms. Miller:

Our Office received your applications for water rights 63-33427 and 63-33430 on February 2, 2011. Unfortunately these applications did not include a map showing the lands that would no longer be irrigated. According to your applications, you plan to reduce the current irrigation of 18.7 acres by placing 13.5 acres of these water rights into the water bank. This would leave 5.2 acres still being irrigated.

I have enclosed an aerial photo map with this letter showing the borders of these two water rights. Please clearly mark with a highlighter or similar type of method the 13.5 acres that will no longer be irrigated and the 5.2 acres that will continue to be irrigated. After you have completed the necessary markings, please return the map to my office.

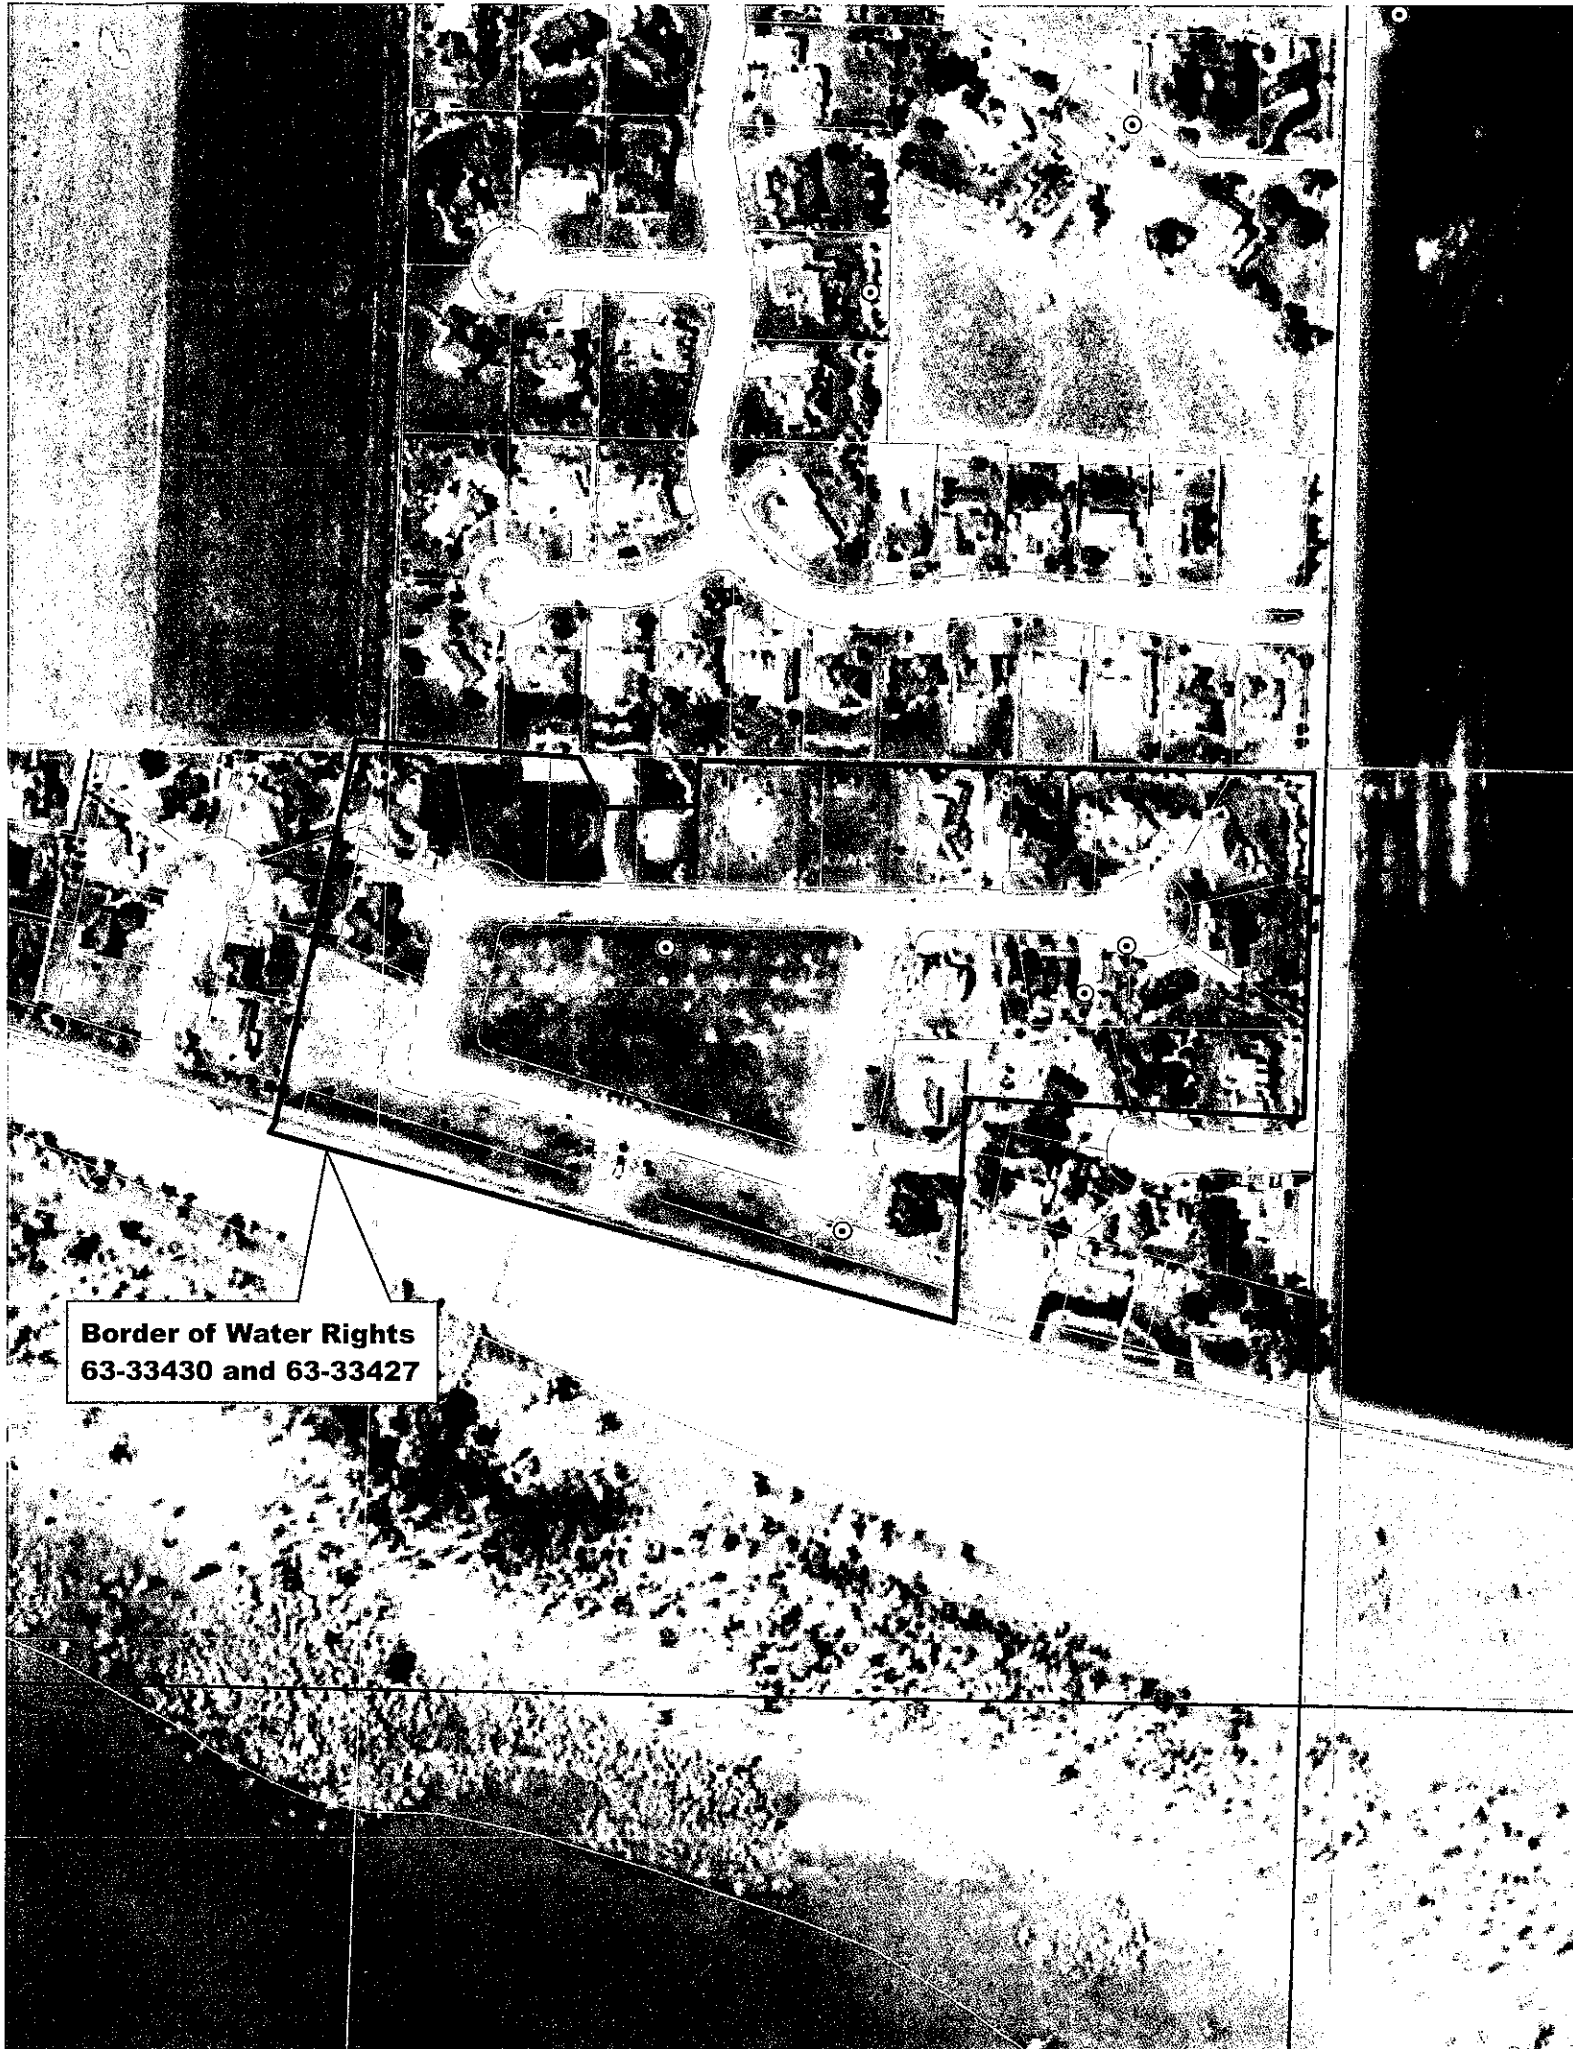

If we do not receive the marked map by March 7, 2011, we will return your applications. You will be able to re-file the applications, but they will need to include the acres that are going to be irrigated and those that will be retired to be placed into the water bank.

If you have any questions or concerns please contact me at the above address.

Respectfully,

Daniel A. Nelson
