Re: Water Right No. 63-2549B

Dear Mr. Stubblefield:

I called your office last week and spoke to Gail Brown about the above referenced water right, copy enclosed. She was very helpful and suggested I contact you in this regard. Original right 63-2549 was split into two portions, A and B. Both rights were confirmed by court decree in 2009 in the Snake River Basin Adjudication. Both rights include a condition stating they are diverted from the same point of diversion from the West End Drain.

Gary Tracy owns right 63-2549A. He filed an application to correct an error in his right: he stated his diversion has been near his house about ¼ mile east of your diversion. Please see the enclosed copy of his application. The map shows the recorded diversion for both rights (yellow dot), and the green dot represents his actual diversion.

If his application is approved, this will result in a minor clarification of your right: delete the information stating both rights have the same diversion point. In these situations, your right is known as an "associated right" that is slightly clarified regarding such details. Nothing else would change in your right. This is standard department policy for such situations.

Approval of an application is sent to the applicant and to an owner of an associated right(s) affected by the approval. Both owners have an opportunity to appeal the decision if necessary. Everyone is afforded due process in this manner.

You are not required to respond in any way regarding the application. However, you are welcome to submit comments to this office by April 4, 2011, if you have any concerns. Please contact me at 334-2190 if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steve Lester', is written over a horizontal line.

Steve Lester
Water Rights Supervisor
