Subject: permit 96-9186

Mr. Reed,

I have had a few minutes to re-read your permit file. In short, the problem is the difference between the Public Land Survey quarter-quarter addresses SENE vs NESE. The order of those directional letters is very important and too frequently mixed up.

For reference, I have attached a pdf photo/map hybrid showing your property and a pdf copy of the permit as it was issued in 2005.

I find that the place-of-use, and the point-of-diversion are both in the **NE** quarter of the **SE** quarter. The point of diversion was advertised in the correct location, the **NE** quarter of the **SE** quarter, (abbreviated the NESE).

However, the place-of-use was advertised in the **SE** quarter of the **NE** quarter (abbreviated SENE), which is the quarter-quarter directly to the north and I believe is incorrect. This may have been a typo at the newspaper but the permit was also issued with the same, reversed order addresses.

The field examiner failed to clarify the Public Land Survey addressing in his report, but before I issue a license I must. If you compare your permitted place-of-use, with the licensing amendment place-of-use, you will see the difference that reversing those directional letters makes.

Thank you again for connecting with me by phone today. I hope this email clarifies the issue for you.

I wish you a problem free recovery from your surgery. I will be expecting to receive your reply soon.

Michele Edl
Associate Engineer
