WATER RESOURCES
WESTERN REGION

8. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
10N	5W	10									16					1.1			17.1

Total number of acres to be irrigated: 17.1

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? Shares in Lower Payette Ditch Company

10. a. Who owns the property at the point of diversion? Applicants
 b. Who owns the land to be irrigated or place of use? Applicants
 c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. We have a very high under ground water. During the irrigation season the water comes up to just 3 feet under the ground surface. When we irrigate it floods our basement so we would like to drill this shallow well and pump from it to alleviate our high ground water during the irrigation season. We will retain ownership of our shares in the ditch company even though we will replace that water with well water.

12. Time required for completion of works and application of water to proposed beneficial use is 1 years (minimum 1 year).
 13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

PROPOSED CHANGE OF WATER RIGHT

Mick Manning of 682-A Old Steese N, Fairbanks, AK 99712, filed Application No. 76992 to transfer one water right with a 1920 priority date from a spring totaling 0.04 cfs. The purpose of the transfer is to correct an error in the legal description of the point of diversion and place of use claimed, recommended and partially decreed in the SRBA. Water will be used at the current place of use in the NWSW of Section 19, T11N, R4W.

For a full description of the rights and /or the proposed transfers, please see www.idwr.idaho.gov/apps/ExtSearch/WRFiling.asp. Protests may be submitted based on the criteria of Sec 42-222 and 42-203A, Idaho Code. Permits will be subject to all prior water rights. Any protest against the approval of this application(s) must be filed with the Director, Dept. of Water Resources, Western Region, 2735 Airport Wy, Boise ID 83705 together with a protest fee of \$25.00 for each application on or before April 4, 2011. The protestant must also send a copy of the protest to the applicant.

RE: Application for Permit 67-15050

Dear Mr. and Mrs. Alder:

Following our telephone conversation yesterday, enclosed is an "Amended" Application for Permit form that incorporates the changes we discussed. We have included a copy of your original application so you can compare the two forms. Please note that the changes we have made to the form include:

1. Reduction in the quantity of water requested. We have reduced the amount to one inch per acre which is the standard amount allowed for areas over 5 acres. The calculation for the amended amount is: $17.1 \text{ acres} \times 0.02 \text{ cfs} = 0.342 \text{ cfs}$ which is rounded to 2 digits past the decimal pursuant to Department guidelines. This amount of water does not change the filing fee you submitted.
2. The irrigation season has been changed to our recommended season for the area you plan to irrigate.
3. We have inserted a place of use description under item 8. Please note that it appears your place of use falls in two quarter-quarters so we have inserted acreage in both areas. This can be adjusted at the time of licensing if it is found to be different than indicated.
4. We have added information to the remarks under item 11 that discusses your shares in the Lower Payette Ditch Company. As mentioned during our phone conversation we may attach a condition to this permit, if approved, requiring you to retain ownership and continue payment for your ditch shares even if you don't use the water any longer.

If you agree with the changes made to the form, please sign on page 2 where indicated and return it to this office at your earliest convenience. Once we receive the signed, amended form, we will proceed with advertising the application. If you have any questions or concerns regarding this matter, please do not hesitate to contact me.

Sincerely,

KAY WALKER
Sr. Water Resource Agent

February 11, 2011

To Whom it may Concern,

We are having problems with underground water getting into our basement each summer and we are unable to irrigate the 17 areas around our house. That is the reason for our application to drill for a irrigation well. We would like to get started on drilling before spring. We would appreciate your exploitation our application as soon as possible. Our neighbor is also having problems in his basement. This would help both of us.

Sincerely,

Sheldon Lee Alder

Dixie Alder

*P.S. The underground water is only 5 ft under ground
right now, Summer it is 3 to 4 ft.*

67-15050

*NO RATE stamp, probably received 2/15 or so.

WATER RESOURCES
WESTERN REGION

We have very high under ground water and during irrigation time it comes up more and we can not irrigate this 17.1 acres because it adds more water to the under water

We would like Robert Dawson

208-257-3389 Drilling to drill a 10" well 40 ft deep and we will put in a 10 hpr pump and sprinkler line with 32, 40' sprinkler pipes to ^{use} some of the ~~under~~ under ground water. That way we can water the 17.1 acres and not get water in our Basement.

Thank Lu Alden
