Subject: RE: Amended Application for Permit 37-20743

Jim,

I had to use approximately 1/4 acre of the easement including the pavement, buildings and the pond surface area to generate the acre for mitigation. I am giving the application to Mary for re-advertising this afternoon. She believed she will have it out by noon tomorrow and it will hopefully be advertised on the 2nd and 9th.

Thanks,
Jana

Jana,

Can you calculate from the 2009 imagery the areas covered by pavement, buildings and the pond surface area. If that is not enough there is a 30 ft. District Canal easement along the back of the lot (see attached copy of plat - it's Lot 2) that totals 14,935 sq. ft.
Thanks.

Jim

Jim,

I have begun reprocessing the amended application for permit 37-20743 submitted by your office in behalf of Brian L. and Diane Steffy Smith. Upon review of the file, the map submitted with the amended application does not identify the acre of land the Smith's are drying up for mitigation of the pond. Unfortunately this is a requirement for mitigation and I will need a map identifying the above mentioned acre before I can move forward with re-advertisement.

Thank you,

Jana
