

## MEMORANDUM

**Date:** February 18, 2011  
**To:** Water Right File 96-9186  
**From:** medl  
**Re:** license review

---

The applicants own the property at the place of use but do not own the property at the point of diversion nor the property that their pipeline traverses. However, the permit holder stated in their application for permit, that they have an easement agreement in place.

The examiner shows the place of use within the NESE on his map but gives the SENE as the location in the PLSS grid. I believe that the map is correct and the grid address is an error.

The place of use shape created by Northern region staff included the entire property which would be acceptable for the permissible place of use. However, I reduced the size of the shape to 0.5 acre to match the domestic use limitation.
