

MEMORANDUM

Date: February 11, 2011
To: Water Right File 11-7362
From: cpadilla
Re: Licensing Memo

There are no overlapping water rights that cover the POU for this right. The field examiner identified 9 acres as being within the POU however the maps he drew in the field exam only cover ~3 acres. There was a map submitted with an Assignment of Permit in 1994 that reflects a lot of land that encompasses just over 9 acres. I believe that this is meant to be the POU.

The volume was calculated by finding the smallest figure between:

9 acres x 3.5 afa = 31.5 afa

0.18 cfs x 1.9835 x 200 days = 71.4 afa

The field examiner recommended that the PD be located in the SWNENE but the PD is actually located at the permitted location of the NWNENE. This is based on GPS points from the field exam and aerial imagery. No amendment is necessary.
