

MEMORANDUM

Date: February 04, 2011
To: Water Right File 63-10735
From: cpadilla
Re: Licensing Memo

The license will be based on the field examiners findings. It appears from imagery and photos in the field exam that 2 acres may not have been irrigated in full. This license will be issued for 2 acres however if an administrative action is ever to occur regarding this right, this right will most likely be reduced based on forfeiture.

The place of use for this right is also known as 4310 Linder. There are two rights that overlap this parcel including right 63-16800 and 63-2406. 63-16800 is for domestic use and is diverted from the same well as this right. In addition right 63-16801 is diverted from this well for a home directly south of the main home. 63-2406 has been disallowed in the SRBA.

Even though it appears the right holder meant for this right to be supplemental to Farmers Union ditch water, the permit was not conditioned as such. No supplemental language can be added to this license since it was not on the permit.

New people own the parcel where this right is located. The license should be mailed to the current owners address which appears to be the old address for the current listed owners.
