Re: Evaluation of Sufficiency of Information Submitted

Application proposes modifying the place of use for 4.80 cfs of ground water rights used to irrigate 256.4 acres located approximately 2.8 to 3.3 miles east and 0.28 to 1.25 miles north of Idaho. Applicant is removing end guns from southern pivot and is transferring acres to smaller half pivot. Since the application only modifies the place of use to include adjacent lands, and since there is no hydrologic change, the transfer was processed, and can be approved, without advertising.

- **Authority to File:**
The applicant has included a warranty deed for all properties involved in the transfer.
- **Water Right Validity:**
Water rights 43-4022A, 43-4023A and 43-4024C were decreed in the SRBA 3/26/2003. Water right 43-2441B was decreed 10/21/2002; and water right 43-2356A was decreed 10/23/2002. Recent Aerial photography indicates that the property involved with this transfer appears irrigated.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed uses are recognized as beneficial uses of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
