RE: Water Permit No. 63-33077

Dear Water User(s):

The Idaho Department of Water Resources (IDWR) is in the process of licensing your water right permit for commercial uses from ground water.

In evaluating a permit for licensure, IDWR must quantify the maximum diversion volume of water that was used in your system during the development period for your permit, roughly August 2009 to August 2010. There is some information that will provide us useful information in calculating a diversion volume for your commercial use such as; water measurement records, data regarding industry standards, past water records, and/or estimates on how many hours/day/year water is diverted and at what diversion rate. Please submit any of the above items, or any other information that you find pertinent, within **30** days to IDWR.

Once IDWR is able to assign your water right a diversion volume, we will issue your license. Your cooperation is appreciated in this matter and let me know if you have any questions. You can contact me at (208) 287-4944.

Sincerely,

Cherie Padilla, Sr. Water Resource Agent
Water Allocation Bureau
