It has all been fixed. It has an annual volume of 14.6 AF. I removed condition N11 and added condition C04.

Chad,

According to the information supplied with the transfer, they used the lake initially.

In the evidence that they supplied and is scanned in, the original well was already partially dug on August 29, 1945. The dedication ceremony was May 26, 1946 with the first campers in June. The original well was replaced in 1971 with the current well. All of this information is in the scanned file under evidence. That is what I made the recommendation on.

Hi Chad,

We have a pending transfer for 95-11027, and before it can be approved, we need to get a firm date as to when the original well was installed.
