Subject: RE: 22-163B Water Supply Bank lease

Here's the delivery history of this Water Right #22-163 since 1978:

Water Right #22-163 was originally for a total of 4 cfs with a 4/1/1896 priority. In 1978, Transfer #2241 was filed to temporarily transfer 1.33 cfs from the Siddoway diversion to the Canyon Creek Lateral pumps. The transfer of the 1.33 cfs was later made permanent in Transfer #3146, approved in 1985. Water Right #22-163A (1.33 cfs) represented the portion transferred to Canyon Creek Lateral, and #22-163B represented the portion (2.67 cfs) assigned to the Siddoway diversion. Therefore, from 1978 to 1989, water right #22-163A (1.33 cfs) was delivered to the Canyon Creek Lateral pumps and water right #22-163B (2.67 cfs) was delivered to Siddoway Canal.

In 1990, Siddoway Sheep Company filed transfer #3729 to move #22-163B (2.67 cfs) to the Canyon Creek Lateral diversion. In the VIEW DOCUMENTS tab for inactive water right #22-163, there is a disclaimer from Siddoway Sheep Company that they are "disclaiming as right, title, and interest in water right 22-0163B." In other words, the entire ownership of the right (4.0 cfs) was being relinquished to Canyon Creek Lateral. Therefore, from 1990 to 2010, Water District #1 has delivered both #22-163A (1.33 cfs) and #22-163B (2.67 cfs) to the Canyon Creek Lateral diversion.

However, when the SRBA claims were filed, it appears Siddoway Sheep Company filed a claim for #22-163B for 2.67 cfs for a pump as a point-of-diversion upstream from Siddoway Canal. Canyon Creek Lateral filed a claim for #22-163A for 1.33 cfs. The IDWR recommended the full 1.33 cfs for Canyon Creek Lateral in #22-163A, but only recommended 1.7 cfs for Siddoway Sheep Company for #22-163B at their claimed point-of-diversion. Water Right #22-163B for 1.7 cfs was preliminarily decreed in the SRBA to Siddoway Sheep Company in 11/24/2008. Claim #22-163A is still in the recommended status of the adjudication.

If Water District #1 were to change its water right accounting to the new SRBA record, it would result in decreasing the 4/1/1896-priority water right for Canyon Creek Lateral from 4 cfs to 1.33 cfs (Water Right #22-163A), and the 1.7 cfs representing newly decreed water right #22-163B would be placed in the Water Bank according to Monica's email below.

Here is an application to lease from the Water Bank. Has this water right been used during the past few years? If you have any comments on this send them to me.

Thanks,
Lyle

Subject: 22-163B Water Supply Bank lease

Hi Lyle,

We received an application to lease all of 22-163B to the Bank on April 27, 2007. I am getting ready to accept it for lease through the end of 2012. Do you have any comments as watermaster? Thanks!

Monica
