RE: Water Right Permit No. 84-12147 Woodland Meadows Subdivision

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. Before a license can be issued the following information must be submitted.

Two different types of beneficial use are claimed: "Domestic" for 14-lots, and "Irrigation" for 7-acres. If 7-acres of Irrigation is to be claimed under the "Irrigation" component within the area described on the map (outlined in blue), the exact 7-acres that are irrigated will need to be outlined. This is due to 40 acres being outlined within the SWNW quarter-quarter, and 30+ acres being outlined within the NWSW quarter-quarter. We would need to be able to distinguish where within that permissible place of use the 7-acres are being irrigated.

If these 7-acres cannot be determined and drawn, the other option would be to drop the Irrigation component, and go with just the Domestic "internal and external use," which allows each lot internal use, and to irrigate no more than ½ acre (not to exceed 13,000 gallons per day per home).

Please respond, and return the requested information within 14 days.

If you have any questions, please call me at (208) 287-4920.

Sincerely,

Sandy Hemenway
Sr. Water Resource Agent
