

AMENDED - M E M O R A N D U M

Date: January 25, 2011
To: Transfer 76130 File – Wynn Dewsnap Family Revocable Trust
From: Jeanie Robertson
Re: Evaluation of Sufficiency of Information Submitted

The original application only listed one of three domestic rights. A field exam revealed that all three needed to be included as the wells were being tied together, hence the amended application. Additional fees were collected for re-advertising.

This transfer dries up 6.6 acres of irrigation and converts 0.13 cfs and 22.4 AF to stock water use from a well at an existing feedlot and also ties in two nearby domestic wells as back-up for the feedlot. All three wells are existing and no new wells will be drilled. Right 43-10806 was split up front three ways for this and two other transfers: a dairy (76133) and a PPU (76136). (The dairy one has already been approved.) Location of the property is approximately 11 miles SE of Malta and about ¾ mile East of HWY 81.

- **Authority to File:**
The amended application was filed and signed by Wynn Dewsnap on behalf of the Wynn Dewsnap Family Revocable Trust. (Agtec Engineering and Environmental Associates was listed as Representative on the original application.) A lien holder release agreeing to the transfer was received from Farm Credit West with the original application.
- **Water Right Validity:**
Right 43-10806 (Parent of 43-13655) was decreed on 6/28/2002. The three D&S rights involved (43-13535, 43-13536, and 43-13537) were all late claims reported on 11/26/2010 and are currently working their way through the Objection and Response timelines, but have not yet been decreed. Recent aerial photos of the area show irrigation of the property being dried up under 43-13655, so forfeiture should not be an issue.
- **Injury to Other Water Rights:**
None anticipated. No new wells will be drilled.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No negative impacts anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Stock water is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
