RE: Transfer Application for Water Right 34-7239A

Dear Mr. Powers,

After discussing your transfer application with Boise, it has been determined that additional information is required. The source of water right 34-7239A is ground water and is primarily supplemental, 283 acres supplemental and 16 acres primary, based on the license.

To prevent enlargement of this right you will need to submit additional delivery information. The type of information could be pump records, water district records, delivery records and/or any other information for at least the last five years for each, ground water and surface water. IDWR needs to know, on an annual base, how the ground water and surface rights were used together.

IDWR is holding off advertising this transfer since most applicants find it very difficult to obtain this information. Enclosed is a copy of the Transfer Memo (section 5d4) that discussed enlargements for you to review. Below is a link to the transfer memo if you wish to review the entire memo.
