Re: 69-11521 Transfer

Dear Rob,

On November 8, 2010 Idaho Power filed a notice in the change of ownership for water rights 69-11521 and 69-11942. In our cover letter we also described an apparent discrepancy between the described point of diversion for 69-11521 and its actual location. We also included the required \$25 per water right (\$50) as required to file the notice in the change of ownership. The department did process our change of ownership for 69-11942 but informed us that we would need to file a transfer for water right 69-11521. This transfer would both correct the point of diversion discrepancy and serve as a notice in the change of water right ownership. On January 5, 2011, David Blew met with you to discuss the transfer of this right and the amount Idaho Power owed to complete the transfer of 69-11521. At that time, you determined that because the notice in the change of ownership for 69-11521 was not processed the company had in effect a \$25 credit. I have enclosed a copy of the receipt with your hand written notations noting the \$25 credit. The cost for a transfer of 4 cfs is \$370 leaving a balance owed of \$345.

Enclosed with this letter is an application for transfer of a water right for 69-11521 and a check for \$345. If you have any questions about this transfer please contact David Blew at 388-5292

Sincerely,

Jon Bowling, PE
