RE: Michael Vaughan's Transfer of Water Right 29-348B

Dear Carl,

In processing the referenced transfer above, the Department noticed that water rights 29-348B, 29-2268 and 29-11799 were stacked on one another. If 29-348B is transferred off your land, you will have to dry up 34 acres from water rights 29-2268 and 29-11799 to prevent enlargement of those rights.

Review the enclosed map to see where you will no longer be able to irrigate. The Department needs to hear from you by December 20, 2010 confirming that you understand what will happen once the transfer is processed.

Sincerely,

Denise Kidman
Water Resource Agent
Eastern Region

Enclosure

Carl Barnes will have to dry up 34 acres from WR 29-348B as well as 29-2268 and 29-11799 due to stacked water rights.
