RE: Licensing Review Memo

Time Line:

Application for Permit Received: 2/19/80

Permit Approved: 4/17/80

Proof of Beneficial Use Received: 3/27/90

Field Exam Conducted: 8/8/91

Conditioning:

Comment	Water Permit Condition Report
Updated to R05 to include that this is w/i WD 63	005 Use of water under this right is subject to control by the watermaster of State Water District No. &DISTRICT.
Carry to license	004 The issuance of this right does not grant any right-of-way or easement across the land of another.
Update to R02. The lockable device should be maintained.	01D A lockable device, subject to the approval of the Department, shall be installed on the diverting works in a manner that will provide the watermaster suitable control of the diversion.

PD Summary: The water from the Boise River is dumped into the Canyon Ditch and then the right holder re-diverts the water to the field. This right was not permitted with a point of injection or point of re-diversion as the water is diverted into a manmade structure and there is only one point of diversion from the Boise River.

The rights listed below that use this point of diversion have different legal descriptions listed in the water right record. A GPS point was recorded for this PD and I am confident that this right describes the location correctly but, because the discrepancy, I will not add the PD overlap condition.

Tag #	Location	Rights that Use PD	Uses
None	NENW of Sec. 15 4N3W Gov Lot 5	63-138D/E, 63-252, 63-233E, 63-369, and 63-9346	Irrigation

POU Overlap Analysis: There is surface water that overlaps the POU for this right. The surface rights are from the Canyon Ditch Co. On 6/3/99, Sharla clarified in a memo that the land covered under this permit does not have any shares from the ditch company. No other rights are appurtenant to this land.

Volume and Diversion Rate: The field examiner found 25 acres and recommends 0.02 cfs/acre or 0.5 cfs for the diversion rate. The volume is based on the standard 4.5 afa/acre or 112.5 afa.

Ownership: Taxlot data shows Canyon County as the current owner of the POU. I will send the license to the current owner, CE Harris, and cc the county with an ownership change form.

Amendment Needed?: NO.
