RE: Transfer 72275 - Water rights 29-30, 29-31, 29-13320 & 29-13321

Dear Mr. and Mrs. Phillips:

On October 14, 2005, you were sent a letter requesting additional information, on or before November 1, 2005, for a ground water (well) right 29-2379 that may be affected by the proposed transfer. The letter requested the following information in order to complete the review analysis:

1. Is there any ground that you irrigate from the well that is not covered by your surface water rights? If so, then the ground irrigated by the well and not be the surface water must be identified.
2. The transfer proposes to move the place of use for the surface water rights to accommodate a center pivot. Do you also plan to irrigate the new place of use with the ground water right?

Enclosed are two aerial photos to assist you in determining the place of use. Both of the aerial photos have the place of use for the ground water right outlined in yellow. And one aerial also has the proposed place of use for the surface water outlined in red.

The Department will hold further processing of your application for 30 days to allow submittal of the required information. Additional time may be granted by the Department upon receipt of a written request and sufficient justification for an extension. After that time, if adequate information is not received, the Department will issue a preliminary order to reject or deny the application.

Thank you,

Keith C. Wilson
Senior Resource Agent
