Subject: correction to well locations

Sterling well
location correct...

Mr. Sterling

I have attached a new map of the locations for your wells.

From our conversation this morning, I have guessed at the different location for the new-existing well for this transfer. That point looks a little like a daisy. It's a circle surrounded by 4 squares 2/3 of way toward the corner along the field edged by Ustick Rd.

I also took the time to speak with personnel in IDWR well construction group. So far we have moved one well from the middle of the field to a location in the corner. I understand that that well is closely associated with your irrigation water right 63-31306. Please correct us if that's still not right.

The well construction folk welcome corrected locations for all your wells, including the domestic well. That point in the middle of your field is the best information they have for your domestic well. That well is associated with Sterling Landscapes domestic water right 63-15734. Please help me and them, position that well closer to its correct location. I will keep my copy of this map close at hand. Fax (287-4800) or email me any corrections or call me to discuss them further.

Thank you!
Michele Edl
