Thank you Ms. Edl.

I have forwarded your questions to John Sterling to confirm – I should hear from him soon. I think one year will be fine and the two points you identify are correct – but I will verify with John. Hope the holidays treated you well and have a wonderful 2011.

Subject: transfer 73890

Mr. Conrad,

I am completing the data entry and review for transfer #73890 acting on right 63-10029. And I have a few minor questions.

Years to complete

I searched the transfer application and I did not find a request for a specific number of years to complete this transfer. I understand from Pam Skaggs that the default time frame is **one year** and that is the length of time I am giving Mr. Sterling to finish the changes requested by this transfer. Please contact me as soon as possible if that is not correct.

Well Locations

I have found that the Department has several points described as wells on the Sterling Landscape property. I have attached a screen shot of those points projected against 2009 aerial photography. There are 7 points (one is underneath the SWSW label) described as well locations. I suspect that there aren't really that many wells in place.

I have labeled the two points which I believe are correct for this transfer. **Would you please confirm for me that I have selected the correct points?**

I would also welcome corrected identification for any of the other points. It makes sense to do some data cleanup while I am in this area of the database.

I hope to have this transfer ready for advertising from the Western Region office the first week in January 2011.

I hope you had a wonderful holiday break.

Sincerely,

Michele Edl
