Nick,

This is to certify that, as per our phone conversation of December 14, 2010, Lutherhaven's old water well, located in the **NWSW**, Section 11, Township 49 North, Range 4 West, will still be used for irrigation purposes only.

The well drilled in late summer, 2009, for drinking water, located in the **NWNW** Section 11, Township 49 North, Range 4 West, ended up producing very poorly and will not be used.

The second new well, drilled in early winter, 2009 for drinking water and located in the **SWNW** Section 11, Township 49 North, Range 4 West, produces sufficient water for the camp at this time and will be used.

Our current transfer application lists the first new well that was drilled. It should instead list the second well only.

Thanks very much for making this change. If you have any questions, don't hesitate contacting me.

Thanks, too, for your time and assistance!

Sincerely,

Bob Baker

Subject: FW: Transfer No. 75969

Bob,

To follow up our phone conversation today: The old, historic well, residing in the **NWSW**, Sec 11, Twp 49N Rge4W, will still be used for irrigation purposes. The first well drilled to provide drinking water, residing in the **NWNW** Sec 11, Twp 49N Rge 4W, ended up producing very poorly and will not be used. The second new well drilled for drinking water, residing in the **SWNW** Sec 11, Twp 49N, Rge 4W, produces sufficient water and will be used.

Currently the transfer application lists the first new well that was drilled. It should instead list the second well only. Please return this email with a signature confirming the change. If you have any questions, feel free to contact me. Thanks!

Bob,

Thank you for the email, I apologize in the delay in getting back to you. Congratulations on the successful hunt!

As I indicated in my earlier letter, I believe an amended transfer application is needed. I've spoken with the Department staff members from our Coeur d' Alene office who conducted the field visit earlier this year. They indicated two wells have been drilled to replace the older well DEQ is requiring be taken off the drinking water supply. Currently the transfer only lists one point of diversion. I am currently waiting for our Coeur d' Alene office to send down the GPS points for the two new wells.

One question I do have is will the old well be abandoned our still used to supply irrigation? Feel free to give me a call if you would like at (208) 287-4949. And email is fine as well.

Hi, Nick...

Perhaps this will be the best way to connect back and forth!

I need to know what steps need to happen to continue with the filing of the above referenced transfer and adjudication claim No. 95-11027.

I was under the impression that we'd filed all the proper paperwork this past spring, but it looks like there are still some holes to fill.

Let me know what you need from me.

Thanks for your perseverance in trying to connect. I've been out on vacation for a couple of weeks (bagging a moose on the Locsha!)

Have a great rest of your week in Boise.

B
