RE: Application for Transfer of Water Right No.

Dear Applicant:

The Idaho Department of Water Resources (IDWR) is reviewing your application to transfer to change the above referenced water right order to evaluate and process your application.

Water Right 63-10029 authorizes only a consumptive use. Your transfer application requests a change to include wildlife and aesthetic storage in a pond. A change of the historical use and a comparison of the historical use to consumptive use. The historic use may be different. You must submit documentation which supports the extent of the five year period prior to filing your transfer application. The historic consumptive use will be the basis for the annual transfer.

Your transfer application states that the intent is to identify a water right associated with it. Is it a share? What are the pond dimensions?

Water Right 63-10029 has an artesian well as surface, department standards require it be capped by 11/01 - 04/01. Your transfer application requests a change to the current season-of-use. Will the system be on a separate system? If you have a separate system, Water Right 63-10029 may have to be split.

Please submit the requested information for a review. We seek additional time to provide the information for processing. Your written response including the time to seek the information, must be received by February 12, 2009.
