

MEMORANDUM

Date: June 15, 2010
To: transfer 73890
From: medl
Re: confirmation of intent

I received a phone call from Mr. Vic Conrad yesterday, June 14, 2010. He confirmed that his client, Mr. Sterling, intends to continue with the transfer on water right 63-10029.

We briefly discussed the ramifications of the historic consumptive use statement provided by Mr. Friday.

There a significantly reduced quantity of water available for this transfer. Even a rough calculation with the revised volume indicates that the right will not cover the year round use requested by the transfer. Mr. Conrad has reached the same conclusion and is looking for alternatives. He asked if the Department would be willing to look at a rough draft. I assured him that we would and that we would welcome an opportunity to discuss this transfer and expedite processing the rough draft, if he wished to make a personal visit to department.

Mr. Conrad also told me that although he and his client were in regular communication, Mr. Sterling had been injured while out of state and was recovering.
