

MEMORANDUM

Date: January 07, 2011
To: Water Right File 74-15435
From: cpadilla
Re: Licensing Memo

The volume for this license is based on 230 cattle. The recommended volume per the field examiner's handbook is 3.1 afa.

Since a physical measurement was taken on the system, we must assume that the system's capacity is at least 0.04 cfs since there are two rights diverted from the system at 0.02 cfs each.
