Subject: Follow up from Aaron's departure

Hi Pam:

Aaron was working on getting Star Sewer & Water municipal permit 63-31969 licensed. This was part of an overall effort to get their muni rights squared away for a follow up transfer. Also, licensing this would confirm current service area that can be used for pending approval of application 63-32644 for rafn use.

Last word I had from Aaron was that he requested a current service area map in early August. I understand the service area has been in dispute with City of Eagle but supposedly was resolved, allowing Star wr business to proceed.

Current barcode show file checked out to Aaron. Can you shed any light on this? Is someone assigned to complete the licensing? Is there something I can do to help? Thanks Pam.

Steve
