Craig:

That shape works great for the appl I have. We will proceed with appl approval. If it's possible for you to license the permit in the next couple of months, that would be helpful. Please let me know if license is issued & then I'll continue with city about the transfer they want to do.

Thanks for all your help with this.

Steve

Hey Steve,

Ciscell was able to convert the Cad file to an ArcMap file. Nothing we get from the outside ever really fits our database layers so I tweaked it to fit better with our GCDB and taxlot lines. I think this shape, for all practical purposes, matches the map submitted by SSWD.

Later,
c

Craig:

Thanks for checking it out. I bet the 8/2/10 Star Bndy is the current shape. That date matches a note I got from Aaron that he was expecting the current shape soonest.

I've attached contact info for city consultant Justin Walker if that will help with anything. I think Aaron got the newest info from Justin.

I will wait to hear if the cad file can be converted etc.

Steve

Steve,

Ok, well Aaron's stuff is pretty raw but I thought I would show you what I am looking at.

I have attached the 5 files to create the shape file for City of EAGLE and the map that I based the shape file on. I know this wasn't what you were looking for specifically but I thought you might want it as a point of reference.

Then I have attached the 5 files for what I think to be is the old shape file for the Star Sewer and Water District (SSWD) service area ("Refined Shape.shp"). The reason I think it is the old shape is because it overlaps what I understand to be the City of Eagle service area and has a modified date of 9-17-2008.

What I think is the new service area for SSWD is a file I found on one of Aaron's folders which is called "Star Bndy (8-2-10).pdf" I do not have this shape in an ArcMap usable format. It looks like the city sent it to Aaron in an AutoCad format. I can see if the GIS people can convert this to a usable file, if not, then we will need to create it and it will take some time.

Take a look and let me know if this is what you are looking for.

Thanks,
c

Hi Craig:

Shelley told me you inherited this one to follow up on licensing per Aaron's field exam this summer. I've been working with city via consultant Justin Walker. City is trying to get things licensed so can file a transfer to list all their wells as pod's for all their rights.

Additionally, they filed appl 63-32644 for more municipal water in a RAFN scenario. Advertising is done & no protests were filed. The only thing I need for this appl is the current service area (we used an outdated one as provisional boundary in processing this appl). Apparently the service area has been a problem, conflicts with Eagle or something like that. If I remember correctly, Aaron said that finally got fixed & city was to provide the current service area map to be used in licensing 63-31969 & for appl 63-32644.

Did they provide the current map? Thx for checking it out.

Steve
