STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

Ident. No. 63-33357WATER RESOURCES
WESTERN REGION

1. Name of applicant(s) Brad or Stacy Pintler Phone 208-465-5390
Name connector (check one): ☐ and ☐ or ☐ and/or

Mailing address: 12744 Deer Flat Rd. City NampaState ID _____ Zip 83686 Email: bpintler@heritagewifi.com2. Source of water supply Well which is a tributary of _____

3. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	¼	¼	¼	County	Source	Local name or tag #
02N	03W	13			SE	SW	Canyon	Existing Well	
02N	03W	13			SE	SW	Canyon	New Well	

4. Water will be used for the following purposes:

Amount 0.18 for Irrigation purposes from 3-15 to 11-15 (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

5. Total quantity to be appropriated is (a) _____ cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. 8" well existing and proposed new well

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11.

For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ Noc. Proposed well diameter is 8" inches; proposed depth of well is 400 feet.d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ Noe. If well is already drilled, when? 2005; drilling firm Davis;Well was drilled for (well owner) Brad Pintler; Drilling Permit No. D0031649

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower; show total feet of head and proposed capacity in kW. _____

b. Stockwatering; list number and kind of livestock. Horses/ Cattle 6 head ?

c. Municipal; show name of municipality or the applicant's qualifications as a municipal provider. _____

d. Domestic; show number of households _____

e. Other; describe fully. _____

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
02N	03W	13												9					9

Total number of acres to be irrigated: 9

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? No other water rights, This will be the only source to irrigate

10. a. Who owns the property at the point of diversion? Brad Pintler
- b. Who owns the land to be irrigated or place of use? Brad Pintler
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Water used for irrigation, No other water rights

10/18/10
B.P.

water bearing zone between 260 ft & 320 ft

12. Time required for completion of works and application of water to proposed beneficial use is 2 years (minimum 1 year).

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

RE: Application for Permit 63-33357

Dear Applicants:

We are in receipt of the e-mail submitted in response to our letter of October 6, 2010, concerning the use of water in close proximity to the Dry Lake area of ground water decline. Thank you for your response.

You noted in your e-mail that the water bearing zone to be appropriated is between 280 and 350 feet. When you came into our office on October 18th you added a water bearing zone to be appropriated of 260 to 320 feet. Please advise me which zone you want me to attach to the application for permit.

We also need to have a map showing the location of the wells and the area you intend to irrigate. I have included a 2009 aerial photograph showing your property. Please mark on this map the location of the existing well, proposed well and where you intend to irrigate.

In additional review of this application, we find that the existing well you have included on this application for permit was drilled in 2005 under a domestic drilling permit. In order to use this well for irrigation purposes, you need to submit an upgrade fee to change the drilling permit to show the well will be used for irrigation purposes. Please submit an additional \$125.00 to upgrade your drilling permit fee.

Please submit the requested information for application processing to continue. You may seek additional time to provide the information by making a written request to delay or interrupt processing. A response, including the requested information or a request for more time to seek the information, must be received within thirty (30) days. The application will be voided without a timely written reply. No refund of filing fees will be made for a voided application.

If you have any questions in regard to this matter, please feel free to contact our office at 334-2190.

Sincerely,

KAY WALKER

Dear Kay Walker:

In regards to your additional information request dated 10/6/2010.

Application 63-33357

In answering your questions to the above application:

1. Water Availability in this area? We have had are existing 8" well for 4-5 years know and have had no problems with water or pumping. We are not in the Dry Lake area but as you mentioned are Northeast of that area and far enough removed we have not seen a problem. Also our existing well runs the house and a water to air heat pump that may pump enough with picking up the discharge from the heat pump we may not need a 2nd well, it was put on the application in case the existing well would not keep up with domestic needs and irrigation needs.
2. How do you propose to prevent injury to other ground water users? In the event that the existing well will not keep up with the needs for irrigation and domestic and 2nd irrigation well is required, we would be able to stop use of the second well during the time period that is proven that use of the second well causes injury to others.
3. the water bearing zone ? I had already gave Kay this information in the office I believe it was 280 – 350 ft

Thanks,

Brad Pintler

RE: Applications for Permit 63-33357 and 63-33358

Dear Applicants:

We are in the process of reviewing the above applications for permit that were submitted to our office on March 30, 2010, and find that we need additional information.

Application 63-33357 is for the irrigation of 9 acres within the SESW, Sec. 13, Twp. 2N, Rge. 3W, and proposes use of an 8" existing well that was drilled in 2005, and the addition of one new well. In April of 2005 a member of our staff determined that the area just west of your proposal had significant decline of the ground water levels and is known as the "Dry Lake" area. This decline may have been caused by increased urbanization and reductions in water use in this area. In order to proceed with review of your proposal we request that you submit information regarding the following:

1. Water availability in this area.
2. How do you propose to prevent injury to other ground water users?
3. The water bearing zone to be appropriated is from ____ to ____ feet.

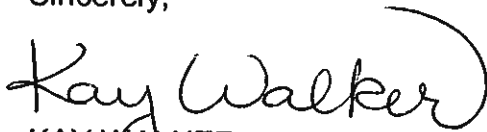

Application 63-33358 was filed for the irrigation of 70 acres and a commercial use for a mint still and sprayer within the N1/2NW, Sec. 19, Twp. 2N, Rge. 2W. This application proposes development of a 10" well for this use. We need to know what the proposed water bearing zone to be appropriated is before we can proceed. Please submit written information stating: "The water bearing zone to be appropriated is from ____ to ____ feet." We can proceed with processing of this application once we receive your response to this information request.

We also note that both of the applications list 6 head of horses/cattle under the stockwater item #7 on the forms. If you wish to include stockwater as a use on these applications, the use should be included under item #4 on the forms. A stockwater use for this number of stock can be considered incidental to your irrigation and does not need to be included unless you wish to file on it as a separate use.

You can either submit your response in writing or come into our office and add information to your application forms. Please submit the requested information for application processing to continue. You may seek additional time to provide the information by making a written request to delay or interrupt processing. A response, including the requested information or a request for more time to seek the information, must be received within sixty (60) days. The applications will be voided without a timely writer. reply. No refunds of filing fees will be made for voided applications.

If you have any questions in regard to this matter, please feel free to contact our office at 334-2190.

Sincerely,

A handwritten signature in black ink that reads "Kay Walker". The signature is fluid and cursive, with a large loop at the end of the last name.

KAY WALKER
Sr. Water Resource Agent
