

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

Ident. No. 78-12389

1. Name of applicant(s) Canyon Pines RV Resort Phone 208-628-4006
Name connector (check one): ☐ and ☐ or ☐ and/or

Mailing address: P.O. Box 1427 City RigginsState ID Zip 83549 Email: _____2. Source of water supply Ground Water and Little Salmon River which is a tributary of N/A and Salmon River

3. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
23N	1E	32			NW	NE	Idaho	Well	D0029057
23N	1E	32			NW	NE	Idaho	LSR Intake	

4. Water will be used for the following purposes:

Amount .06 for Irrigation purposes from 2/15 to 11/30 (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)5. Total quantity to be appropriated is (a) .06 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. 6" well or River intake can be used to supply common irrigation pump

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11.

For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☒ Noc. Proposed well diameter is 6" inches; proposed depth of well is 202 feet.d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ Noe. If well is already drilled, when? 2003; drilling firm JRUWell was drilled for (well owner) Canyon Pines; Drilling Permit No. D0029057

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower; show total feet of head and proposed capacity in kW. _____

b. Stockwatering; list number and kind of livestock. _____

c. Municipal; show name of municipality or the applicant's qualifications as a municipal provider. _____

d. Domestic; show number of households _____

e. Other; describe fully. _____

RECEIVED

AUG 04 2010

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
23N	1E	32		2															2

Total number of acres to be irrigated: 2

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? None

10. a. Who owns the property at the point of diversion? Applicant
- b. Who owns the land to be irrigated or place of use? Applicant
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____
11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Well is also used to supply resort commercial use under 78-12177. Well pumps to 10,000 gallon tank then can be used for irrigation and/or commercial use. A separate irrigation pump can use water from LSR or storage tank to sprinkle resort landscaping.

12. Time required for completion of works and application of water to proposed beneficial use is 1 years (minimum 1 year).
13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

MEMORANDUM

TO: Application No. 78-12389
FROM: J. Westra JFW
DATE: December 27, 2010

RE: Salmon-Clearwater Processing, Basins 77-79 Western Region
Evaluation of Sufficiency of Information

The application proposes irrigation of 2 acres of common area in an RV park adjacent to the Little Salmon River approx. 1 south of Pollock Idaho on US 95. The system sources will be an existing ground water well or pump directly from the river. Both P/Ds are on the applicant's property.

The well also supplies commercial use for the RV park—#78-12177. Tag No: D0029057 well report attached.

Contact person for the Camp is Jeff Dean.

Wild & Scenic River (WSR) Processing

General Information - WSR processing applies to portions of Bs 77 and 78 but not to Bs 79. It is rarely expected in Bs 78 since WSR right 78-11961 covers federal land upstream from the Rapid River Fish Hatchery slightly southwest of Riggins.¹

Typically WSR issues would be in Bs 77 upstream from Long Tom Bar on the Salmon River, WSR right 77-11941.² This also incorporates the entire Middle Fork Salmon River drainage, MSR right 77-13844.³

WSR processing is required for any source/diversion upstream from any WSR right. This applies to all sources and uses unless the applicant shows the source is not hydraulically connected to any WSR rights.

Specific Information for this Application

Wild & Scenic designation is not applicable to this application.

Minimum Streamflow Rights (MSF)

General Information - MSF analysis applies to all surface water upstream⁴ from any MSF rights. Basins 77-79 have various MSF rights that might affect applications. By agreement with SO regarding these basins, specific MSF conditions of approval are not necessary provided the reviewer checks MSF issues and documents the file with the results (7/8/09 telephone conference).

Downstream MSF right 3-8 on the Snake River⁵ is not subordinate to "future dcmi" uses or "future non-dcmi (with cfs limits)" uses. Downstream Salmon River MSF right 79-14119⁶ is subordinated to future dcmi uses but not to future non-dcmi uses.

¹ POD = T23N-R1W-S12.

² POD = T25N-R5E-S31.

³ POD = T23N-R16E-S33.

⁴ Shallow ground water tributary to surface water might involve MSF issues under conjunctive management thinking. Discuss with your supervisor if this comes up.

⁵ POD = T31N-R5W-S10.

⁶ From mouth of river T29N-R4W-S14 upstream thru about Shepp Ranch T24N-R6E-S12.

All Basin 77-79 MSF rights upstream from the ending point of 79-14119 (mouth of Salmon River) include subordination to future dcmi uses. Most of those upstream MSF rights are also subordinate to various amounts of future non-dcmi uses. None of the future non-dcmi cfs rates have been exceeded yet by new approvals. Further MSF analysis is generally not needed until a specific future non-dcmi cfs rate is exceeded.

Specific Information for this Application

MSF analysis is required for the proposed source and use upstream from MSF rights 3-8 and 79-14119. This application also involves MSF right #78-12362.

This leads to the following MSF conclusions for this application:

- Senior MSF right 3-8 will not be subordinated to the proposed use(s).
- Senior MSF right 79-14119 will not be subordinated to the proposed irrigation use.
- Senior MSF right # 78-12362 will be subordinated to the proposed irrigation use(s).

The attached MSF spreadsheet shows the application meets the criteria for MSF rights in the same basin.

Discussion

On 11/26/10 our office received favorable comments from DEQ at McCall. Comments received from IDF&G on 12.27.10 discussed the need for pump intake screening per standards—see letter.

Effect on Existing Water Rights:

There a number of domestic water rights from groundwater and surface water source upstream of the Applicant. There are also a number of diversions .02-.05 cfs downstream toward Pollack (1+ mile) which are residential/cabin domestic uses. There should be no effect given the proposed .06 cfs diversion rate. License #78-12177—02 cfs commercial use for RV Park.

Sufficiency of Water Supply:

The river flow is sufficient well above minimum flows.

The well has a water bearing zone of 130 to 205 water bearing zone. 20 gpm yield- pumps into a 10,000 gal. storage tank for commercial use also.

Good Faith, Delay or Speculative Purposes:

The RV campground already exists and water right #78-12177 is licensed—Field exam. documents business operation and proposed need.

Financial Resources:

Minimum financial resources needed—well, storage tank, and delivery piping already in place under commercial use.

Local Public Interest:

Received favorable IDFG & IDEQ comments, no protests filed. The application is in the local public interest.

Conditions of Approval

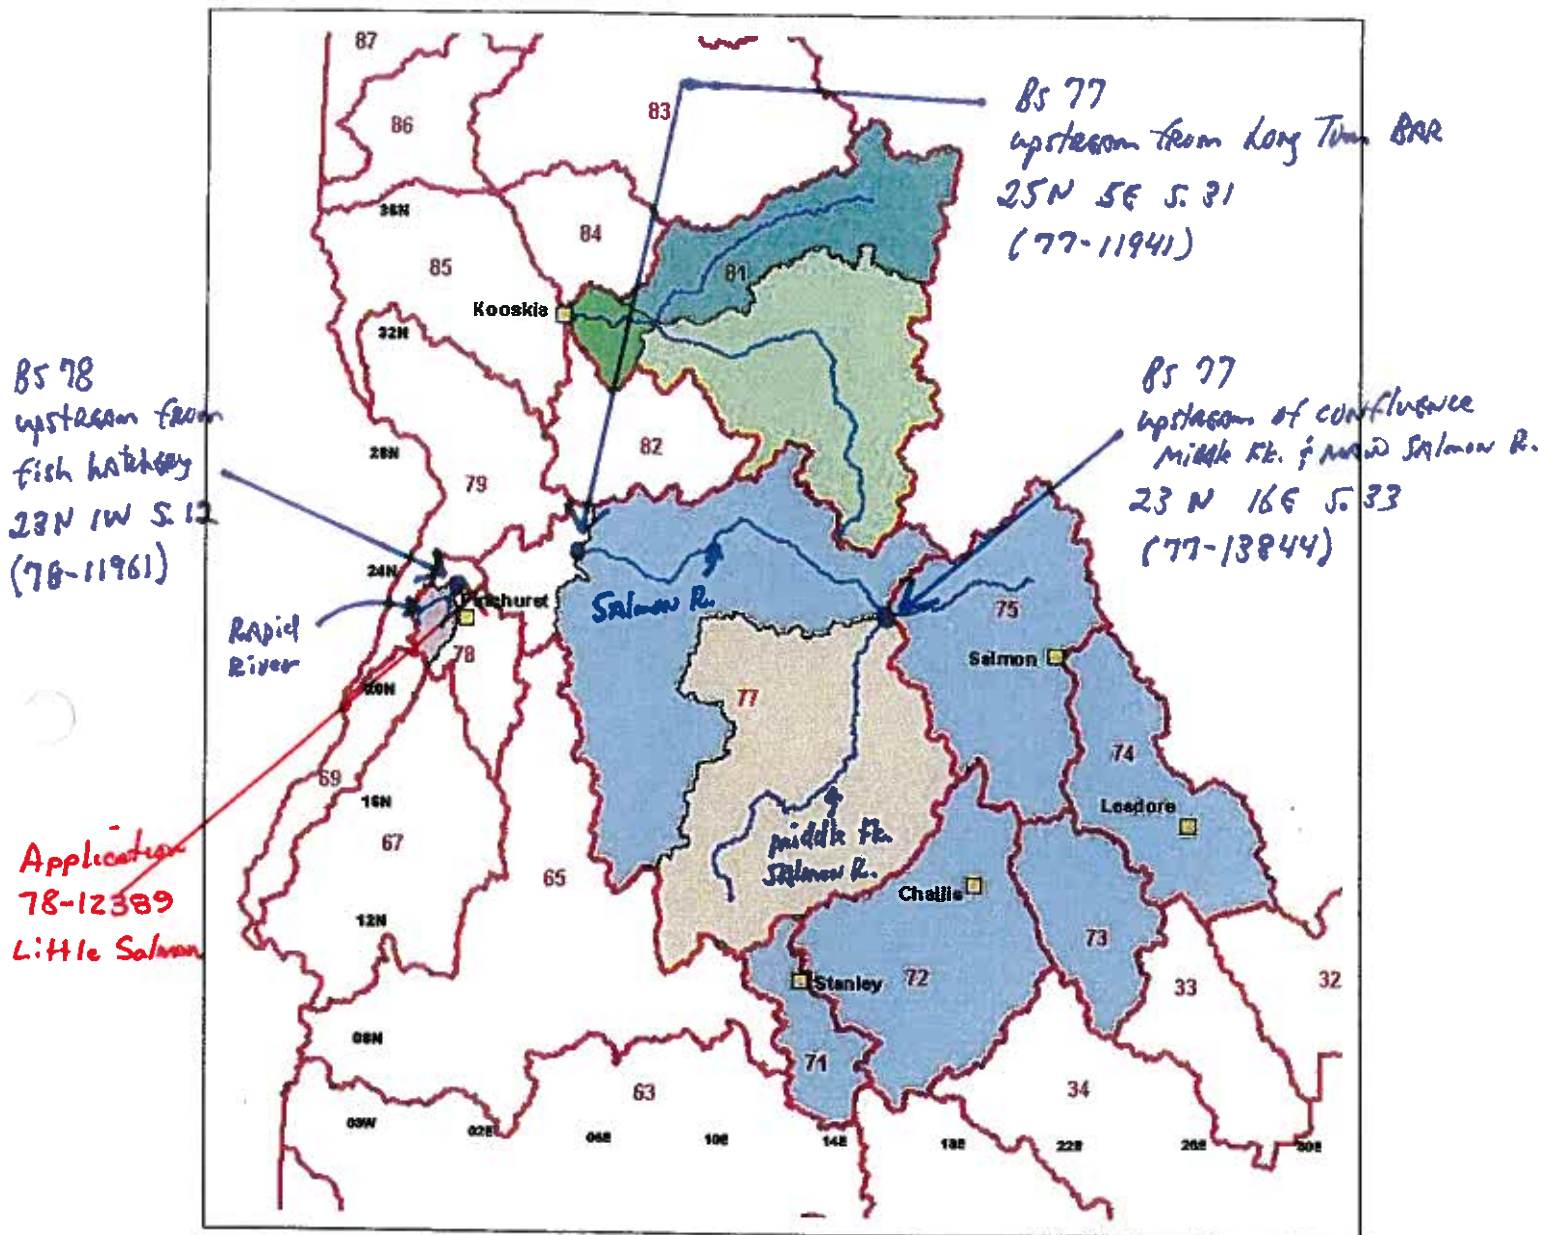

004, 121, R68, 01M

029 standard - Prior to the diversion and use of water under this approval, the right holder shall comply with all fish screening and/or fish passage requirements of the Idaho Department of Fish and Game

BS 78 MINIMUM STREAMFLOW RIGHTS -- QUERY 12/1/2009						
Basin	Sequence	Priority	Source	Subordinate to Future DCM	Subordinate to Future Non DCM (CFS Limit)	Non DCM CFS Approved Since 4/1/2005
78	12235	4/1/2005	BOULDER CREEK - entire creek	YES	NO	N/A
78	12233	4/1/2005	ELK CREEK - entire creek	YES	NO	N/A
78	12234	4/1/2005		YES	NO	N/A
78	12236	4/1/2005	HAZARD CREEK - entire creek between both rights	YES	NO	N/A
78	12237	4/1/2005	LITTLE SALMON RIVER - thru 21N 1E S35, confluence w/ Round Valley Cr.	YES	7	0
78	12362	4/1/2005	LITTLE SALMON RIVER - river below confluence w/ Round Valley Cr.	YES	52.7	0.54
DCMI APPL OK, NON-DCMI APPL OK UNTIL NEW APPROVALS EXCEED 7.0 CFS FOR BS 78. SEE "PROCEDURE" BELOW.						
PROCEDURE: DCMI APPL ok for all msf rights in Bs 78 as noted in review memo. NON-DCMI CONSUMPTIVE USE APPL: Non-dcmi consumptive use approvals for Bs 78 since 4/1/2005 total less than 1.0 cfs, allowing at least 6.0 cfs for additional approvals before need more analysis. Senior Little Salmon River msf rights are subordinate to this junior application for non-dcmi consumptive use. CAUTION - Creek msf rights do not include future non-dcmi cfs. Creek msf rights are tributary to river below Round Valley Cr. so involve river msf 78-12362 with 52.7 future non-dcmi cfs. Possible to have new appl that involves creek msf & river msf factors to be addressed in review memo. If non-dcmi consumptive use application falls within creek msf right, note in review memo that senior creek msf right will not be subordinate to this junior application, even though river msf right(s) will be subordinate to this junior application.						
EXAMPLE: Appl 78-12363 for 0.13 cfs irrigation & stock, future non-dcmi consumptive use. Creek msf rights n/a but tributary to river above Round Valley Creek. River msf rights allow at least 7.0 cfs for new non-dcmi approvals regarding subordination clause. Have not reached 7.0 cfs for new approvals yet. Process appl and note review memo that senior msf river rights will be subordinated to this new use. Updates to this spreadsheet will eventually show 0.13 cfs future non-dcmi has been approved.						

78-12389 trib to 78-12362 the limit has not been exceeded. (52.7 cfs.)
 .06 cfs, OK.

December 22, 2010

Mr. John Westra
Idaho Department of Water Resources
Western Region
2735 Airport Way
Boise, ID 83705-5082
RE: Water Right Application # 78-12389

Dear Mr. Westra;

We have reviewed a new application for an irrigation water right on the Little Salmon River (LSR), submitted by Canyon Pines RV Resort. The proposed location is Idaho County, Sec 32, T23N, R01E. The stated withdrawal amount was 0.06 cfs from 2/15 to 11/30 annually, for irrigation.

The LSR is an important anadromous resource for the citizens of Idaho. It is possible that three fish species listed as threatened under the ESA could be in this river section, additionally annually up to a half million hatchery Chinook salmon smolts may pass by the proposed intake site. We request that the intake is screened with 3/32 inch mesh opening (NOAA Fisheries standard). The Department has a program to assist in fish screening in anadromous waters and the best contact is our Anadromous Screen Shop in Salmon, their number is 208-756-6022. It is the applicant's sole responsibility to install and maintain the fish screen in functioning condition. If the applicant agrees to install and maintain a proper fish screen on his intake, we have no other concerns.

If you have further questions or need further information please contact Dale Allen, Regional Fishery Manager in McCall at 208-0634-8137.

Sincerely,

Scott Reinecker
Regional Supervisor

**RE: Processing of New Appropriations in the Salmon Basin
Application for Permit #78-12389**

Dear Staff Members:

Attached is an application for permit that is being processed in the Western Regional Office. The applicant proposes the use of his existing ground water source (well) and the Little Salmon River as the sources. The water use is 2 acres of irrigation.

As part of the application processing for the Salmon Basin local public interest requirement, both your agency's written comments are needed. Please submit them to the Western Regional Office.

Should you have questions, please contact me at the Western Regional Office, phone 334-2190.

Thank you,

John Westra, Manager

Enclosure: application #78-12389

Subject: RE: Canyon Pines RV, Irrigation Water
Attachments: Denny Creek Inquiries.doc

Ok, I have some information.

The U of I guy that Jeff is referring to is most likely Jim Zimmerman who contracted with us to do field exams. Carter doesn't remember anything specific about this short of an info request in 2004 from a Gene Noble who was concerned about Jeff Dean was de-watering Denny Creek. I have attached Carters conversation memo.

Ken did the SRBA recommendation on this, most likely based on what Jim found. The file for the parent right 78-4013 (78-12254) shows it is bar-coded to Ken up north. It is possible that Jeff moved his POD from Denny Creek to the Salmon to avoid the fight about De-watering Denny Creek, but that is just speculation.

Perhaps Jeff can file a transfer to move his POD from 78-12254 down stream out of the Salmon with the condition that he only pumps when there is water in Denny Creek.

Anyway, I am almost positive that he got my name from the cover letter we sent when we issued license 78-12177. I might have spoke with him on the phone as of recently about that license, but other than that, I think he has mistaken me for someone else.

Thanks,
c

Jeff,

Appreciate our conversation this a.m. regarding the RV park and associated water system. As we discussed, the name of the U of I person may be helpful in addition to the documents you mentioned. I think I get the picture and will be able to help you work through any pending issues to obtain the necessary authorization(s) to cover the irrigation use at the RV Park. Additionally, I have attached is a PDF of the Water Right License that covers the "commercial use" for Canyon Pines specifically from the new well. I will talk with Craig Saxton to better understand the water right background as it relates to the SRBA. If you have questions for me, I can be reached at 334-2190 or 859-2003. I'll keep in touch

Rob Whitney

RE: Phone Conversation w/ Jeff Dean

I called Jeff Dean today to follow-up on the correspondence that I sent to Canyon Pines RV regarding their irrigation water.

Jeff informed me that there is not a pump in the river and that he will irrigate the RV Park with well water.

He also informed me that he was extremely upset with me for sending them mail regarding this and he was taking care of it with someone else in the department. I was unable to respond or get further information from him.

CERTIFIED MAIL

RE: Potential Illegal Water Use

To Whom It May Concern:

On September 15, 2009, our office sent correspondence (enclosed) to you regarding the potential unauthorized irrigation use found at the Canyon Pines RV Resort. To date, we have not received a response from you regarding this matter. The attached map shows land that I found to be irrigated using Little Salmon River water without a valid water right.

I request your cooperation to resolve this matter by:

- identifying what water right or rights cover your development if our records are not correct;
- cease further diversion of water to the identified parcels if you do not have water rights;
- and/or obtain a valid water right for your irrigation development.

Please respond to our office within 14 days of the date of this letter as to the status of the lands identified in the attached map. Please note that diversion of water in Idaho without valid water right is illegal pursuant to §42-351, Idaho Code and subject to civil penalties of up to \$300 per acre of land irrigated. Please further note that any unauthorized use of water for irrigation in 2009 may be cause for the Department to issue a notice of violation and cease and desist order.

Please contact me at 208-287-4944 if you have questions or need assistance regarding this matter.

Sincerely,

Cherie Padilla
