Re: Power Use

Speaking with Carol Stansell at (208)448-2711 on 12/28/2010, this is their year round and sole residence. Their house is entirely "off the grid," and they have housing for battery storage for extended use of power. They are unable to utilize solar power due to all the trees surrounding their property, so hydroelectric is their only source of power. Carol stated that the stream never dries up in the summer, and has never frozen over in the winter. Use is 365 days per year.
