Jeff,

I do not see anything for Mahoney in our records but will double check with Noreen. She will be out in the field for most of the week, but will be in Friday morning.

Cynthia,

Do you have any record of a water bank filing for Ed or James Mahoney in B63? The condition on their permit (63-31218) required them to provide mitigation by leasing a portion of the right to the bank. The mitigation right was a portion of 63-270.

We will keep a eye out for the application and will add a comment in the WSB database comments about future licensing conditions.

Cynthia,

We spoke last week about a permit that required a mitigation right to be placed into the bank as a condition of the permit. This is the one. I told Mr. Mahoney to go ahead and fill out a lease application. The ownership documents are pending at Western, but haven't been processed because of other splits to 63-270. I think we could go ahead with the lease if we can get copies of the documents from Western.

Mr. Mahoney plans to sell the property including the permit and the mitigation right. The new owner would file any required ownership documents.

For future reference, I think when we issue the license, we can change the conditions and remove the right from the bank and update the portion of 63-270 to show mitigation.

Jeff
