RE: Water Right Permit No. 65-13921

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

 x **Point of Diversion—the well is within Lot 6, Block 3, Crown Point No.7 Subdivision**

 x **Place of Use—the home authorized by this right is within Lot 5, Block 3, Crown Point No.7 Subdivision instead of Lot 6, Block 3. Note that Lot 6 is covered by decreed water right 65-12332**

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee within 14 days.

In addition, I have enclosed a Notice of Change in Water Right Ownership form. According to taxlot data from the county, the place of use may be under new ownership. If that is the case, the new owner should submit the ownership change form with evidence of ownership and the required \$25 fee. Please note that the amendment must be received before the Department can update ownership of the water right.

If you have any questions, please call me at (208) 287-4944.

Sincerely,

A handwritten signature in cursive script that reads "Cherie Padilla".
