I presume your calculations on the lease are modified from the application – I could replicate them so I agree, except that I believe you probably intended to add the 21 acres for a total of 69.7.

Again, I need to know for sure where these acres are. I am a little concerned with b/u within the last 5 years on corners in Sec 33. Corners in Sec 5 & 6 were last irrigated in 2007; corners in Sec 1 last irrigated in 2006. Presently I find only about 1034 ac irrigated, meaning there are 149 dry under the rights (total 1183), with only 70 going into the bank....

Hi Cindy,

Sorry to send you the entire lease documents but the applicant had diversion rate and volume numbers on their applications that were way too high. The Jentzsch family applied to put these acres into the Bank. Let me know if you have watermaster comments or, of course, questions.

Monica
