PO Box 493
Mackay, Idaho 83251

Re: Transfer Application

Dear Mr. Powers,

After preliminary review of your transfer application, it is determined that some changes and additional information is required. IDWR is returning your application in order for you to make the necessary changes. Please review the list below of the information IDWR is requesting.

1. A recorded warranty deed in the name of John L. Powers Trust needs to be provided.
2. For the purpose of the transfer, it should be to add a POD. You will need to keep the original POD and there should be no change in the POU due to the supplemental water situation.
3. The POD location you listed might be a mistake. It is listed as NWSE of Section 27 which puts the POD at the south west end of your property. An aerial photograph has been included with this letter; please put a dot on the map indicating the location of the proposed POD.
4. It might be beneficial if the description of the transfer (Part 1A2) contained information about the loss of water in the ditch. Explain about other water right uses installing pumps in the river which stopped the rotation of the ditch. Explain why the surface water is no longer available.

I have included a new application partially completed. Please add the above information and resign the application. Send the completed application, warranty deed and the aerial photograph with the POD indicated back to the office. If you have any questions, please let me know.

Sincerely

Denise Kidman
Water Resource Agent
