Subject: Transfer applications for 55-11877 and 67-7851

Contacts: Fred Price

Fred:

IDWR received the 2 transfer applications. Both can be processed without legal notices – there is some wiggle room in IC 42-222 for situations like this where legal notices are not productive.

That means we can process and approve the transfers quickly. A few details need to be confirmed first, which we can do via email instead of amending the applications in more traditional ways.

55-11877 *

Part 2A of the application requires attaching a copy of the right as currently recorded. This was not done, but I can add a copy of the decreed right to the application.

Part 2B of the application was completed but is not applicable. Part 2B is for changing a portion of a right to a separate system, which is not the case here.

67-7851

This right is recommended in the SRBA with a 9/8/10 objection deadline. The recommendation is the currently recorded right for purposes of processing a transfer.

I assume you want the transfer to be approved prior to the right being decreed. Is that correct?

Part 1B.3 of the application lists the correct diversion point as SWNENE, but the application map shows SENENE. Please confirm the map is correct and the actual diversion is in SENENE.

The above Part 2A & 2B notes also apply to this right. I can add a copy of the SRBA recommendation to the application for Part 2A.

Your email confirmation of these points will serve to amend the applications for processing to be expedited. Approval of the 67-7851 transfer cannot occur until after the SRBA objection deadline and confirmation that objections by other parties have not been filed.

Please give me a call if you have any questions. Thanks for your help with these applications.
