Re: Evaluation of Sufficiency of Information Submitted

Application proposes modifying the place of use for 0.8 cfs water right diverted from Green Creek used to irrigate 45 acres and a 1.0 cfs spring water right used to irrigate 49.9 acres by creating a 78.4 acre permissible place of use located approximately 2.2 to 2.5 miles south and 1.4 to 2.0 miles west of Elba. After the transfer a combined total of 49.9 acres will be irrigated within the proposed permissible place of use. Since the application only modifies the place of use to include adjacent lands, and since there is no hydrologic change, the transfer was processed, and can be approved, without advertising.

- **Authority to File:**
The applicant has included a quitclaim deed for said properties assigning ownership of all properties to the applicant from the original owner.
- **Water Right Validity:**
Water rights 43-192 and 43-4074 were decreed in the SRBA 6/28/2002. Recent Aerial photography indicates that the property involved with this transfer appears irrigated.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed uses are recognized as beneficial uses of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
