Jim

My typo probably confused things. 0.02 cfs/acre times 8.1 acres is around 0.16 cfs times conversion of 1.9835 af/day/cfs yields around 0.32 af/day or a pond of 0.32 af.

Remarkably that figure is similar to what is in the consent order.

Allen

Allen,

Thanks - I had not thought of that. Isn't 0.32 cfs for 24 hrs = 0.64 AF?!!!

Jim,

I looked at the water rights and there is a limit of 0.02 cfs per acre at the field headgate when all rights are combined so since there is 8.1 acres this may limit the 24 rule to 0.32 pr 0.4 af pond.

Am I missing something?

Allen
