RE: Amendment of Permit 65-13912

Dear Mr. Pancheri:

The Idaho Department of Water Resources (IDWR) has received an Application for Amendment of Permit 65-13912 from Dr. Carol MacGregor. Permit 65-13912 is for heating and commercial uses from a spring that is tributary to Moores Creek for 0.50 cfs.

In order to determine your interest in the application, IDWR is notifying you of the changes Dr. MacGregor has requested. Dr. MacGregor has requested the following changes:

Current Beneficial Use

Heating

Commercial

Requested Beneficial Use

Heating

Current Maximum Diversion Rate

0.50 cfs

Requested Maximum Diversion Rate

0.10 cfs

In addition to the above changes, Dr. MacGregor is requesting that IDWR remove conditions of approval #5 and #9 that state:

#5 Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality permitting requirements administered by the Department of Environmental Quality.

AND

#9 Prior to construction of diversion works for the surface low-temperature geothermal water from Belvidere Hot Springs, the right holder must submit plans and specifications for the spring diversion to the Department, and the Department must approve the plans and specifications. The plans and specifications must provide for direct water delivery to water rights no. 65-12891 and no. 65-13332, at no cost to the holder of those rights, to replace reductions in the quantity or temperature of water historically diverted under water rights nos. 65-12891 and 65-13332 caused by diversions under permit no. 65-13912.
