Subject: RE: Request for Licensing of 63-11831
Attachments: NYID Water.pdf

Hello Aaron,

I have investigated the issues raised by your earlier email regarding Darwin McKay's permit no. 63-11831 and provide the following response:

1. We understand the condition requires a measuring device or an agreement to measure. In Shelley's February 5, 1996 permit approval notice, he stated that the department would send further information regarding measuring devices, using power records, and reporting forms. I have asked Darwin about this, and he does not recall receiving these additional materials. If you would please provide them, I'm sure that Darwin would be willing to do what is required by the department to meet the permit's conditions regarding measurement.
2. If the department has requested this information previously, we apologize for failing to respond. However, I could not find any records in the on-line backfile to indicate that this information has been sent to Mr. McKay. Please provide copies of the prior requests to measure and report so that we can respond accordingly.
3. I understand that the water right permit did not authorize a new well or deepening of an existing well. However, I believe that the department did issue a drilling permit authorizing Mr. McKay to deepen his well.
4. The attached documentation from NYID should provide the necessary evidence that the surface water has not been removed from the place of use. Velta shows the number of acres of district water for each parcel within the subdivision, and accounts for the two larger parcels west of the subdivision.
5. I understand that the initial proposed water bearing zone was 160 to 220, but water was not available here and it was necessary to construct deeper. We request that the condition be modified to identify a water bearing zone from 250 to 300 feet, which should be adequate to cover the current construction.

Thank you for the opportunity to respond to your questions. If you have any further question, please let me know. We look forward to licensing of this permit.

Sincerely,
Scott

Subject: RE: Request for Licensing of 63-11831

7/25/2008

Scott,

I have the permit file for 63-11831 on my desk for review. I will complete a thorough review and draft a license as time allows. A few of my initial observations are as follows:

1. Condition of approval no. 3 states, "Prior to diversion of water under this right, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to use power records to determine the amount of water diverted from each point of diversion listed under this right." I don't have any evidence that this condition has been satisfied.

2. I would also like to draw your attention to condition of approval no. 4, which reads, "The right holder shall measure and annually report diversions of water and other pertinent hydrologic and system information as required by Section 42-70,1 (5), Idaho Code." } Per Shelley, let this one slide. All others in Basin 63 with this condition for "1992 drought permit" weren't held to condition requirements.

3. Condition of approval no. 7 says, "This approval does not authorize the construction of any new well or the deepening or enlargement of any existing well." A well driller's report in the permit file indicates that the original well was completed in 1993 to a depth of 256 feet. Another well driller's report in the permit file indicates that the point of diversion authorized under this permit was deepened in May 2005 to a depth of 276 feet.

4. Condition of approval no. 10 states, "This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use." Can you provide evidence that the permit holder maintains the right to use surface water at the place of use authorized by this permit? The cover letter to your field report indicates that a portion of the place of use was recently sold and is now a residential subdivision while Boise Capitals Soccer Association owns the remainder.

5. Permit condition of approval no. 12 indicates that the "Water bearing zone to be appropriated is 160 to 220 feet." However, the driller's report indicates that the well is completed to a depth of 276 feet.

Please address my observations above and provide any additional information that you can to show that the permit holder has complied with all conditions of approval. Thank you.

Subject: Licensing of 63-11831

Hi Pam,

Darwin McKay requested that I inquire regarding the status of licensing permit 63-11831. I conducted the field examination and submitted in November 2006. Mr. McKay is interested in transferring this right to other property. Can you please advise where this one stands in respect to issuing a license?

Thank you,
Scott

FAX COVER SHEET

Date: July 24, 2008
To: Velta, NYID
Fax Number: 378-1274
From: Scott King
Subject: NYID water at 03N 01E 33 SESW & SWSE

Includes cover sheet + 1 pages

Please advise as to the status of NYID project water on the properties identified in the map below, and on the list, which includes the SESW & SWSE quarter-quarters of 3N 1E Section 33. The map below shows in dark outlines the identified Ada County Parcels within these tracts with an identifying number. The following page lists the property address with lot/block with corresponding identification number. The purpose of this inquiry is to provide Idaho Department of Water Resources with evidence that NYID water has not been removed from these properties. Can you please provide a reply and describe the changes, if any, to the status of project water here (e.g. are the properties assessed for project water, and has any water been added to or removed from these properties?). Thank you very much. -Scott
