

MEMORANDUM

Date: November 12, 2010
To: Water Right File 47-8082
From: csaxton
Re: Total Vol Capacity

On page one of the license we normally identify the diversion capacity of the system. Standard language is, **"An examination indicates that the works have a diversion capacity of ____ cfs of water from:"**

This right does not identify a diversion rate because it is an on-stream storage right. Therefore, the language has been changed to reflect the maximum storage volume of the right, **"An examination indicates that the works have a storage volume capacity of 3.9 af of water from:"**

The recommended annual diversion rate is greater than 3.9 af to account for stock use of 0.1 af and evaporative losses of 2.7 af per year.
