Subject: Jones: Permit 65-13961 (& 65-13176)

Hey Andy,

I haven't met with my boss yet but I plan to tomorrow. I have a couple of questions if you can answer them before that meeting if possible. I know this is short notice.

The field exam conducted in 1996 for 63-13176 found a capacity of the two wells we are talking about as permitting as producing 0.05 cfs total. This is 22.5 gallons per minute. Do you happen to know the Horse Power of the pumps in each well? We have $\frac{3}{4}$ and 1 hp pumps.

Anything you have could be useful

Thanks,

c
