No worries Zach. Cindy talked to Terry Short, the ranch manager, and he confirmed that some irrigation is done around the homes from the potable well so we are putting both wells on the right being transferred in. Jeanie

Hey Zach,

Got your map and additional fees, thanks. It brings up another question, however. The application shows two wells, both located very near to each other. The map shows only one. Cindy said she thought the two wells were not connected and that one was for the potable water and the other for irrigation. (She said if they are doing any irrigation from the potable well, like lawn or garden, that maybe some irrigation should also be associated with that well?)

Anyway, should the new right being brought in only have the irrigation well or should it have both?

Thanks, Jeanie
