RE: Water Right Transfer Application – Idaho Youth Ranch.

Dear Jeanie,

Enclosed is a water right transfer application in the name of the Idaho Youth Ranch which proposes to create a 58.9 acre permissible place of use around their campus and a portion of their surrounding property. Currently, ground water right 36-8256 is authorized to irrigate 21.0 acres on the IYR campus property. The IYR intends to irrigate 21.0 acres under the existing water right 36-8256 and 30.9 acres of leased water right 36-2315B (leased from WG Farms LLC, split calculations and agreement attached) within the proposed PPU. ESPA model results (attached) show no mitigation is needed when transferring 123.6 AFA of water right 36-2315B from its current place of use to the IYR point of diversion.

Also enclosed is a check from Brockway Engineering for \$100.00 to cover the transfer application fee. Please copy our office on all correspondence regarding this water right transfer application. Thank you for your assistance on this matter and if you have any questions or comments, please don't hesitate to give me a call.
