Re: Priority Date

This application was originally received on 1/17/2008 for re-charge and stock water during the non-irrigation season. The department requested more information for the recharge use and we were eventually told to put this application on hold while they sought a new claim in the SRBA (45-14182) for historical stock water use during the non-irrigation season. After 45-14182 was recommended we received a letter from Brockway Engineering saying they wished to pursue this application for additional stock water during the non-irrigation season and submitted an amended application on 9/20/2010. There were various problems with the place of use and map in the amended application but finally all the correct information was received on 11/12/2010. Therefore that is the proposed priority date of the permit.

Re: Legal Notice Remarks

Application for Permit to divert a total of 0.05 cfs from Lunch Creek, Dayley Creek, and an unnamed stream, locally known as Antelope Creek or Antelope Spring, for stock water use during the non-irrigation season. The general area is approximately 7 - 9 miles south and 3 ½ - 6 ½ miles east of Burley.
