Department of Water Resources
Eastern Region

Dear Director of the Idaho Department of Water Resources:

In a discussion that I had recently with Blake Jordan, who has reviewed my water right filings, it was determined that in order for my water right applications to be filed, a couple of details needed to be corrected.

I have previously applied for a permit to appropriate new water on my land in Caribou County. I misread the filing fee and hence need to pay an additional \$100 for the 10 acre-feet of pond storage that I previously applied for. I already paid the \$250 for the filing of 1.0cfs of irrigation use. Please note the enclosed check for the \$100 to cover the filing fee of the 10 acre-feet.

In addition, I also submitted several "Notice of Diversion" forms for already existing stockwatering rights that we have changed to watering troughs. Amongst those was a water right in the name of my uncle, Don Mabey, who had deeded me his water rights (water right #29-4449) but the name had never been changed to my name. Attached you will find a "Notice of Change in Water Right Ownership" for this water right. I have also attached certified copies of the line of deed changes. You will note that the ownership changed from Don Mabey in February of 1991 to Chemstar INC. It then was deeded to my mother, Cora Mabey Barnett in February of 1991. In March of 1994, it again changed ownership into the name of Cora Mabey Barnett Trust with me as a trustee. Please make the needed changes to the title of water right #29-4449. It is my understanding that then the "Notice of Diversion" on this water right can be processed.

Lastly, my cousin James Smedley and I share in a grazing association where we lease our land to be grazed by a local rancher. The name of this association is: The Mabey Grazing Association. One of the water rights (#29-10337) is under this name. In our filings of the "Notice of Diversion" forms, James Smedley filed on this water right. His name does not show as an owner on this water right, but does in fact have claim on this water right and it is with my full recognition that this "Notice of Diversion" claim be filed on this water right for James Smedley.

Thanks again for your time. Please feel free to give me a call with questions.

Jack Barnett
