RE: Applications for Permit 45-14106 and 45-14107

Dear Mr. Searle:

Our Department currently has two pending water right applications for permit submitted by Brockway Engineering in your name. One application (45-14106) involves domestic and stock water uses from Woodbury Spring and the other (45-14107) is for re-charge and stock water uses from Antelope Creek, Dayley Creek, and Lunch Creek. We sent a letter to Brockway Engineering in February of 2008 asking for additional information in order to process these applications and we also met in Allen Merritt's office shortly after to discuss your options. As of today, we have still not received the required information or been informed of how you wish to proceed.

This letter serves as notice that the Department will hold further processing of your applications for 30 days to allow submittal of the required information. Additional time may be granted by the Department upon receipt of a written request and sufficient justification for an extension. After that time, if adequate information is not received, the Department will issue a preliminary order to reject or deny the applications.

If you have any questions, or if I can be of any further assistance, feel free to contact me at your convenience.

Sincerely,

Jeanie Robertson
Water Resource Agent
