Re: Applications for Permits for Moo View Cow Palace—Searle Brothers

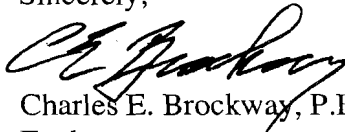

Dear Allen,

Enclosed are two applications for permits for Moo View Cow Palace. The first application is for domestic and stock water to be delivered in an existing collecting pipe from what is known as Woodburry Spring. This pipeline has been used since 1972 under a right-of-way easement by the BLM. A copy of the right-of-way grant #I-3983 is attached. Granting of this permit will allow the use of spring water in the pipeline for four residences and provide year round stock water.

The second application is for winter time use of water emanating from Antelope Creek, Dayley Creek, and Lunch Creek for recharge and stock water. There are currently irrigation rights (45-690 and 45-691) from these sources. The proposed application would allow winter time recharge and stock water use, which has been occurring apparently since 1882. The water is utilized during irrigation season for irrigation from a pump pond. However, in the winter time the flow has historically been diverted to recharge areas adjacent to the pipeline and pump pond. The Burley Irrigation District has repeatedly requested the winter time flows not be allowed to flow in to the canal system, which will occur if the flow is not allowed to recharge.

Enclosed are two Brockway Engineering checks, #7655 for \$100 and #7656 for \$370, which I believe are the correct fees. Please contact me if you need additional information. I believe that Corey Skinner is familiar with the location of this property which has been referred to as the Woodburry Farm in Cassia County.

Sincerely,

Charles E. Brockway, P.E.
