Scott,

I spoke with Craig Saxton, and John Westra this morning, and will be sending out a formal approval in the mail today.

Thanks,

Sandy

Subject: Request for Extension, 65-22912

Good morning, Sandy:

This message is in reference to your October 21, 2010 letter to Jug Mountain Ranch regarding measuring device installation for permit 65-22912. Jug Mountain Ranch is investigating siting alternatives and preparing preliminary designs for measuring device installation. On behalf of the permit holder, we are requesting additional time to get the devices installed. Generally, the most appropriate time to install measuring devices on live running streams is in the fall after irrigation demands have ceased and flows are low. We are aiming to have devices installed this year before the ground freezes and makes installation impossible, but are running short on time. Therefore, we are requesting a six month extension of time to allow for measuring device installation. We will be working diligently during this period to meet the measuring device requirements. We look forward to your reply.

Thank you,
Scott
