Please accept this letter as my protest against allowing any quantity of water to be transferred from the point of diversion granted in Right No. 13-2209.

To allow this transfer would injure those who are rightfully entitled to the use of this groundwater source.

I will be more than happy to furnish the evidence you will need to see that Mr. Balls is entitled to the groundwater source located in Sec. 8 T16S R38E, but not to the source in Sec. 36 T15S R37E.

Thank You,

J. Norman Fannesbeck
