PROPOSED CHANGE OF WATER RIGHT

The J.C. Watson Co, Inc., of P.O. Box 300, Parma, ID, 83660 filed Application No. 76153 to transfer one water right with a 1981 priority date from ground water totaling 2.14 cfs. The purpose of the transfer is to drill a new well and add it as a second point of diversion to deliver water more efficiently. Water will be used at the current place of use about 0.75 miles northeast of Notus, ID.

Permits will be subject to all prior water rights. Protests may be submitted based on the criteria of Idaho Code § 42-211 / § 42-222. For specific details regarding the application, please contact the Idaho Department of Water Resources (IDWR) Western Region at 208-334-2190 or visit www.idwr.idaho.gov with details provided under "new water right applications." Any protest against the approval of this application must be filed with the Director, Dept. of Water Resources, Western Region, 2735 Airport Way, Boise ID 83705 together with a protest fee of \$25.00 for each application on or before November 8, 2010. The protestant must also send a copy of the protest to the applicant.

RE: Applications for Permit 63-33357 and 63-33358

Dear Applicants:

We are in the process of reviewing the above applications for permit that were submitted to our office on March 30, 2010, and find that we need additional information.

Application 63-33357 is for the irrigation of 9 acres within the SESW, Sec. 13, Twp. 2N, Rge. 3W, and proposes use of an 8" existing well that was drilled in 2005, and the addition of one new well. In April of 2005 a member of our staff determined that the area just west of your proposal had significant decline of the ground water levels and is known as the "Dry Lake" area. This decline may have been caused by increased urbanization and reductions in water use in this area. In order to proceed with review of your proposal we request that you submit information regarding the following:

1. Water availability in this area.
2. How do you propose to prevent injury to other ground water users?
3. The water bearing zone to be appropriated is from ____ to ____ feet.

Application 63-33358 was filed for the irrigation of 70 acres and a commercial use for a mint still and sprayer within the N1/2NW, Sec. 19, Twp. 2N, Rge. 2W. This application proposes development of a 10" well for this use. We need to know what the proposed water bearing zone to be appropriated is before we can proceed. Please submit written information stating: "The water bearing zone to be appropriated is from ____ to ____ feet." We can proceed with processing of this application once we receive your response to this information request.

We also note that both of the applications list 6 head of horses/cattle under the stockwater item #7 on the forms. If you wish to include stockwater as a use on these applications, the use should be included under item #4 on the forms. A stockwater use for this number of stock can be considered incidental to your irrigation and does not need to be included unless you wish to file on it as a separate use.

You can either submit your response in writing or come into our office and add information to your application forms. Please submit the requested information for application processing to continue. You may seek additional time to provide the information by making a written request to delay or interrupt processing. A response, including the requested information or a request for more time to seek the information, must be received within sixty (60) days. The applications will be voided without a timely written reply. No refunds of filing fees will be made for voided applications.

If you have any questions in regard to this matter, please feel free to contact our office at 334-2190.

Sincerely,

A handwritten signature in black ink that reads "Kay Walker". The signature is fluid and cursive, with a large loop at the end of the last name.
